

**Guardian 8 Holdings (GRDH-OTCQB)**

**GRDH:** \$7.0 million cv. debt financing closes.  
Maintain target of \$0.90.

<b>Current Recommendation</b>	<b>Outperform</b>
Prior Recommendation	Neutral
Date of Last Change	09/12/2013
Current Price (07/11/14)	\$0.50
<b>Six- Month Target Price</b>	<b>\$0.90</b>

**OUTLOOK**

Guardian 8 Holdings is the developer and manufacturer of the G8 Pro V2, a non-lethal security device designed for use in the professional security industry. Though the sales cycle for the adoption of ENLs is progressing at a slower pace than originally anticipated, we are optimistic in the ultimate commercial success of the Pro V2. Management's commitment is unwavering as demonstrated by related-party financings and management's participation in the private placement of convertible debentures in early June. We maintain our Outperform rating and price target of \$0.90.

## KEY POINTS

- Guardian 8 Holdings has developed and is producing the **G8 Pro V2**, a new non-lethal security device that is designed for use by the professional security industry.
- The introduction of the G-8 Pro V2 has **created a new non-lethal security device category**, which management has named **Enhanced Non-Lethal (ENL)**, which is positioned as a multi-function professional security defense device between single-function Conducted Electrical Weapons used by law enforcement and corrections officers and single-function defensive devices (pepper spray, whistles, etc.), primarily designed for the consumer market.
- For the last two years, management has been cultivating interest in the product through exhibitions at trade shows and with direct contact with the security departments of major corporations. As a result of attending five key trade shows during 2013, 350 additional leads were generated within the Private Security and Hospital Security industries.
  - Guardian 8 continues to build awareness and promote adoption of the G8 Pro V2. Most recently, Guardian 8 participated at the ASIS conference in Chicago, the LD Micro Investor conference in Los Angeles and the annual meeting of the International Association of Hospital & Safety (IAHSS) in San Diego.
  - Guardian 8 will showcase the Pro V2 at the National Sports Safety and Security Conference in Indianapolis (July 8-10).
- Production of an open order for 10,000 units with an initial tranche of 1,800 units.
- The unique attributes of the G-8 Pro V2 are **protected by several patents** filed in the U.S.
- In early 2014, Guardian 8 **established a national sales presence** with the strategic hires of sales director positions. Each is responsible for a 10-state region of the U.S. (West, Midwest, Southern and Atlantic territories).
- An important initial order was placed by a globally recognized family theme park in April 2014.
- **2014 is expected to be a breakout year** as Guardian 8 generates significant revenues from its first product.
- The company received a report regarding a **documented security incident** in which the Pro V2 device was used **successfully to de-escalation a potentially violent situation in a hospital**.
- Management initiated development activities to design and manufacture a personal defense model targeting the consumer market. Retail availability is expected in 2015.
- Guardian 8 has been successful in obtaining capital through equity offerings, the exercise of warrants and the issuance of short-term notes and convertible debentures.
- Management aspires to up-list GRDH from OTCQB to NASDAQ.
- We maintain our Outperform rating and price target of \$0.90.

## RECENT NEWS

### *First quarter of 2014*

On May 14, 2014, Guardian 8 Holdings reported financial results for the first quarter ending March 31, 2014. Guardian 8 generated revenues of \$5,045 from the sales of Pro V2 devices. Though sales were below our expectations, many test and evaluation trial units have been deployed and positive developments have been announced during the second quarter, such as an initial order for G8 Pro V2 units by a globally recognized family theme park. Also, a positive outcome during a hospital security incident, in which the Pro V2 device was used, adds further credibility and endorsement for the need to deploy Guardian 8's ENL. The event documented the successful de-escalation of a potentially violent situation, which validated and verified the precept for the necessity of deploying Enhanced Non-Lethal devices throughout the security industry.

During the first three months of 2014, the company financed operations through issuing notes payable and drawing upon a bank line of credit. Net proceeds for notes payable totaled \$500,000, of which \$475,000 was received from related parties, demonstrating the commitment of company's Officers and Directors and their unwavering belief in the future of the Pro V2 device. The bank line of credit had been established recently in January with Cornerstone Bank, N.A. The company had drawn on the full line of \$700,000 during the quarter; subsequently, on April 28th, the existing line of credit was increased to \$900,000. To further exemplify management's commitment, the credit line is personally guaranteed by the company's CEO.

### ***Domestic Sales***

In mid-April, Guardian 8 announced that a globally recognized **family theme park** placed an initial order for G8 Pro V2 units, along with certification training for the theme park's security personnel. Though the theme park operator was unnamed for reasons of confidentiality, the adoption trend of the Guardian 8's Enhanced Non-Lethal device, the G8 Pro V2, is clearly emerging.

On June 17, 2014, Guardian 8 announced that **Platinum Event Services** of Dallas will be adding the G8 Pro V2 device to its portfolio of security offerings. Platinum provides crowd management services to companies, organizations, concert and entertainment venues, sporting events and commercial and government properties. Platinum Event Services offers a comprehensive menu of security services for events, conventions and property security. With the ProV2, Platinum Event Services can provide the option to offer ENL security services within its portfolio of offerings between unarmed security officers only equipped with night sticks and security officers carrying firearms or contact stun devices, not to mention the enhanced incident reporting capabilities of the Pro V2.

### ***Financings***

Since Guardian 8's inception, operations have been financed through the issuance of stock, convertible & non-convertible term notes and bank lines of credit. Until the sales of its products and training services can satisfy the company's cash requirements, management expects to raise the necessary funds through stock offerings, note issuances and bank financings.

In late May-early June, Guardian 8 Holdings issued **\$7,000,000** of 8% **Convertible Senior Secured Debentures** due of November 30, 2015 through two private placements. Each debenture is convertible into 2,000 shares (conversion price of \$0.50). The purchasers of the convertible debentures also received 7,000,000 5-year Class C warrants exercisable at \$0.60 per share, and upon conversion or maturity of the debentures, the number of Class C warrants shall automatically double.

Net proceeds of \$5,274,741 will be used for repayment of short-term debt (including the line of credit of \$901,510 with Cornerstone Bank of Overland Park, KS that helped finance about half of the company's initial production order for Pro V2), domestic and international sales and marketing efforts, the acquisition of additional inventory and R&D towards the development of a consumer ENL device. Merriman Capital and Noble Financial Capital Markets acted as placement agents.

The convertible debentures were placed with 17 accredited investors, including all seven current board members, though three directors merely converted other outstanding term notes into the convertible debentures. The list of purchasers is impressive with several well-known investors in the convertible and microcap sectors, namely Wolverine Flagship Fund Trading Limited (\$1,500,000), Pinnacle Family Office Investments LP (\$1,000,000), CK Management LLC, (\$1,000,000), Atlas Allocation Fund LP (\$1,000,000), Calm Waters Partnership (\$500,000), Southwell Capital LP (\$300,000), Hard 4 Holdings LLC (\$250,000), Precept Capital Master Fund GP (\$225,000), Sandor Capital Master Fund (\$200,000), CEO Stephen Cochennet (\$170,000), The Precept Fund II LP (\$125,000), James K. Price (\$100,000), Carl Feldman (\$100,000), Vestal Venture Capital (\$80,000), Cranshire Capital Master Fund Limited (\$75,000) Helmsbridge Holdings Limited (\$50,000), JSL Kids Partners (\$50,000), Brett Luskin (\$50,000), Taylor Luskin (\$50,000), Cary Luskin (\$50,000) and Directors James G. Miller (\$50,000) Corey

Lambrecht (\$25,000), Jim Nolton (\$20,000), William Clough (\$10,000), Kathleen Hanrahan and Kyle Edwards (\$10,000).

## OVERVIEW

Headquartered in Scottsdale, Guardian 8 Holdings (GRDH: OTCQB) is the developer and manufacturer of the **G8 Pro V2**, a **non-lethal security device the designed for use in the professional security industry**. Having completed the R&D phase, the company's initial product is available through the company's website; also, units are currently being evaluated in trial programs by potential corporate customers. For over a year, marketing efforts at national and regional trade shows have garnered significant interest in the G-8 Pro V2, especially by security departments that are charged with guarding employees and facilities of large corporations. After the commercial launch of the company's initial device for the corporate market, management plans to design and sell a personal defense model targeting the consumer market for use by private individuals.

Guardian 8 has the design and protective **patents** for the creation of a new category of non-lethal devices for the protection of security personnel and consumers. The category lies between conducted electrical weapons of TASER (for use by law enforcement and corrections officers) and single-action defense devices, such as pepper spray, whistles, etc. (designed for the retail consumer market). By integrating multiple non-lethal technologies with a communications platform, the G-8 Pro V2 offer security officers a **non-lethal layered defense solution**. The company has dubbed this new category as **Enhanced Non-Lethal (ENL)**, and the launch of the G-8 Pro V2 constitutes the **creation of this new category** defined as **multi-function professional security defense devices**.

Despite the usually lengthy sales cycle associated by corporate purchasers, **we expect large-scale adoption of Guardian 8's product by the corporate security market** due to the device's unique assortment of scaled responses and attractive price point. The estimated market is over 3 million security officers in the United States in addition to even larger international potential. The company has received interest from distributors in over 15 countries.

The company has been successful in obtaining capital through equity offerings, the exercise of warrants and more recently by a bank line of credit and a private placement of convertible debt. Between June of 2009 and December 31, 2013, Guardian 8 has raised over \$4.0 million: \$3,024,485 through private placements of common stock and warrants, \$113,625 from the exercise of warrants and \$1,828,433 through the issuance of notes payable. Subsequently, a \$700,000 revolving line of credit was secured in January 2014 and \$500,000 of 5-month 12% notes was issued in February. In late May-early June 2014, Guardian 8 issued \$7,000,000 of 18-month 8% Convertible Senior Secured Debenture accompanied with warrants.

## Professional Security Industry

Management is focused on providing enhanced non-lethal devices to the professional security industry. Currently, approximately 1.1 million security guards are employed in the United States, and the number of security jobs is expected to rise to over 1.2 million by 2020.<sup>1</sup> Management estimates the market to be 3.2 million potential users, including transportation security screeners, real estate agents, subpoena servers, etc. but not including the potential demand for protecting postal, utility and delivery personnel. The professional security market is significantly larger than the law enforcement/correctional market that

<sup>1</sup> Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, 2012-13 Edition, Security Guards (33-9032).

TASER addresses, which is estimated to employ 632,000 police officers and 435,000 correctional officers and jailers.

The professional security industry provides security for personnel and buildings of corporations and governments as well as facilities protection, retail security, executive protection, campus safety, event security, transit security and hospital security. The security guards themselves are often former military and law enforcement personnel as well as civilians whose mission is to protect life and property, which at times requires managing a confrontational situation while dealing with a threat to one's own safety.

---

## Product Potential

Thus far, management has successfully executed the development of the company's initial product, from designing a unique self-defense device, through the R&D and testing phase, to the production of a commercially viable product, all the while marketing the product and building customer interest at industry trade shows across the nation. The company's prototype received the Security's Best award at the ASIS conference in Orlando in September 2011.

Despite the usually lengthy sales cycle associated by corporate purchasers, we expect large-scale adoption of Guardian 8's product by the private security market, especially by major corporations, due to the device's unique assortment of scaled responses and attractive price point. The estimated market is over 3 million personnel providing security for employees, property and assets in the United States. In addition, the potential for significant international demand is high.

The G-8 Pro V2 has been in development for two years with the first production run having been completed in July 2013. Initial market interest is very encouraging. So far, marketing efforts at several private security tradeshows, conferences and industry association meetings have generated at least **1,200 prospects, of which 60 are Fortune 1000 companies**. Initial sales of Pro V2 test and evaluation units began in the second half of 2013.

As the initial units are deployed by early-adopters, awareness will build. The G-8 Pro V2's relatively low price point at \$279.99 per unit (somewhat less than cost of a smart phone) makes the device economically accessible to the protective services industries for broad deployment and **we expect rapid adoption of Guardian 8's ENL by the private security market**, including the security departments of major corporations, hospitals, real estate companies and insurance firms.

### ***Domestic Sales Efforts***

In August 2013, Guardian 8 launched its web store. Items available on the website include the G-8 Pro V2, OC pepper spray canisters, water test cartridges, holsters, batteries, battery chargers and training. The company also has web exposure on LinkedIn and YouTube (Guardian8Inc).

In October 2013, Guardian 8 signed **Nova Security Group** as a distributor to school administrators and campus safety personnel. Nova Security Group provides "less lethal" products to the security industry and has distribution agreements with L3 Communications and Adani of Belarus for body scanners and x-ray baggage scanners, with CIEA (Costruzioni Elettroniche Industriali Automatismi S.p.A.) for walk-through and hand-held metal detectors and Transit for multi-mode hand-held metal detectors. In late October, King Asset Protection Services LLC, a Phoenix-based provider of security guards for high-end homes and executive protection, bought 15 Pro V2s, which were deployed to the 15 security guards he employs.

On January 9, 2014, the company announced the signing of a two-year agreement with the California Association of Licensed Security Agencies, Guards and Associates (**CALSAGA**). Under the arrangement, CALSAGA can provide its 90,000+ membership with the opportunity to purchase package

deals of a Pro V2 unit, holster and instructor course training at an attractive bundle price point. Guardian 8's domestic sales effort ought to be assisted by the alliance.

On February 27, 2014, Guardian 8 Holdings signed a letter of intent (LOI) with **Securitas USA** to test the use of the G8 Pro V2. Securitas-USA manages the security programs for 350 North American hospitals, which employ almost 3,000 security officers. This pilot program is a direct result of the alliance with CALSAGA, which was announced in January. At least 50 G8 Pro V2 devices will be provided to Securitas USA for a period of 90 days, after which Securitas will provide an evaluation report to Guardian 8. The assessment of the Pro V2 device during real-life security situations should bolster the product's claims as a layered defense system in terms of applicability, usability and effectiveness, especially with the device's distinctive ability to record events with both audio and images.

In mid-April 2014, Guardian 8 announced that a **globally recognized family theme park** placed an initial order for G8 Pro V2 units, along with certification training for the theme park's security personnel. Though the theme park operator was unnamed for reasons of confidentiality, the adoption trend of the Guardian 8's Enhanced Non-Lethal device, the G8 Pro V2, is clearly emerging.

Both the Securitas USA and family theme park deployments of the G8 Pro V2 are a direct result of the alliance with California Association of Licensed Security Agencies, Guards and Associates (CALSAGA) which was announced in January. The company's layered defense ENL device is very well suited for deployment in public venues, especially in locations where stun devices and firearms are prohibited by law. Management is specifically targeting other public and sports arena venues under the CALSAGA alliance.

In June 2014, **Platinum Event Services** of Dallas added the G8 Pro V2 device to its portfolio of security offerings. Platinum Event Services offers a comprehensive menu of security services for events, conventions and property security. The ProV2 ENL security devices allows Platinum to deepen its portfolio of offerings by providing an option between unarmed security officers only equipped with night sticks and security officers carrying firearms, which involves more expense and higher risk of liability. In addition, the incident reporting and communication capabilities of the Pro V2 not only provide documentation of an event, but also enhance the deterrent aspect of the effort to de-escalate situations.

### ***International Distribution Agreements***

Guardian 8 received early interest from **international distributors** serving South Korea and Israel as well as countries in Central and South America, Africa and Europe. Distribution agreements have been signed already with companies in South Korea and Mexico. In particular, the company announced in December 2012 that an order for \$10,000 worth of devices had been received from a South Korean distributor. Evaluation units were shipped in July 2013.

The international sales effort was expanded in February 2014 when distribution agreements were signed with Techkomplekt (Russia) and Controles Graficos (Mexico). Eechkomplekt has an exclusive distribution arrangement for G8 Pro V2 enhanced non-lethal (ENL) devices while Controles Graficos entered into a non-exclusive distribution agreement for Mexico. The international sales effort is being coordinated by Jose Rojas, VP of Customer Services.

### ***Anticipated Consumer Model***

Management plans to expand into the retail market with a unit specially designed for the consumer, which is expected to be available in retail stores as well as the company's web store in 2015. Currently, it is being contemplated that the consumer model will be smaller than the Pro V2 and be designed with a non-lethal device, HD video camera and emergency communication platform. Also, management is investigating retail sales through other venues such as amazon.com and the Home Shopping Network.

## ABBREVIATED CORPORATE TIMELINE

Guardian 8 is an operating company having completed the research and development phase and is generating sales from its first product: the G-8 Pro V2. The company was incorporated as Guardian 6 in June 2009 concurrent with the acquisition of all the patentable intellectual rights to the device.<sup>2</sup> Later that year the company's name was changed to Guardian 8. In November 2010, a reverse merger was completed with Global Risk Management & Investigative Solutions, a company previously focused on security information. Resulting company was named Guardian 8, and management proceeded to design, develop, test and market a prototype of the G-8 Pro V2. After two years of R&D, beta-testing and manufacturing process tooling, the initial production run of 120 test units was completed in July 2013. Due to management's marketing efforts, 100 of the devices were shipped within weeks for evaluation to prospects that previously had expressed keen interest in deploying the device. The remaining 20 were retained for training purposes. Since interest in the initial units was high, an additional 1,800 units were produced.

- June 8, 2009 Guardian 6 incorporated; patents & right of device acquired
- August 2009 Name changed to Guardian 8
- November 30, 2010 Reverse merger with Global Risk Management & Investigative Solutions
- September 21, 2011 G8 device received Security's Best award from ASIS Accolades
- March 28, 2012 The company's first product, the G8 Pro V2, debuted at the ISC West 2013
- July 2013 Guardian 8 completed initial 120-unit production run; all units deployed
- August 6, 2013 Guardian 8 launch of web store at [www.guardian8.com/store](http://www.guardian8.com/store)
- September 27, 2013 Offered training class at ASIS 2013 conference in Chicago
- October 7, 2013 1<sup>st</sup> tranche of 1,800 units (part of 10,000 unit open order) in production
- February 4, 2014 Distribution agreements signed with Techkomplekt (Russia) & Controles Graficos (Mexico).
- January 9, 2014 Two-year agreement / alliance with CALSAGA
- February 6, 2014 Hire sales directors for West, Midwest and Southern regions of the U.S.
- February 27, 2014 90 day pilot program with Securitas USA (mgr. of 3,000 security officers)
- April 23, 2014 Globally recognized family theme park placed initial order for G8 Pro V2
- June 17, 2014 Platinum Event Services added the Pro V2 device to its security portfolio

### ***Alliance with CALSAGA***

In January 2014, the company entered into a two-year agreement with the California Association of Licensed Security Agencies, Guards and Associates (CALSAGA). Under the arrangement, CALSAGA can provide its 90,000+ membership with the opportunity to purchase package deals of a Pro V2 unit, holster and instructor course training at an attractive bundle price point. Guardian 8's domestic sales effort ought to be assisted by the alliance.

In late February 2014, Guardian 8 Holdings signed a letter of intent (LOI) with Securitas USA to test the use of the G8 Pro V2. Securitas-USA manages the security programs for 350 North American hospitals, which employ almost 3,000 security officers. This pilot program is a direct result of the alliance with CALSAGA, which was announced in January. At least 50 G8 Pro V2 devices will be provided to Securitas USA for a period of 90 days, after which Securitas will provide an evaluation report to Guardian 8. The assessment of the Pro V2 device during real-life security situations should bolster the product's claims as a layered defense system in terms of applicability, usability and effectiveness, especially with the device's distinctive ability to record events with both audio and images.

<sup>2</sup> The rights, title and interest in all intellectual property rights of the device were acquired from Charles Andy Ross, Jr. for \$300,000 in cash and 14.5 million shares of common stock.

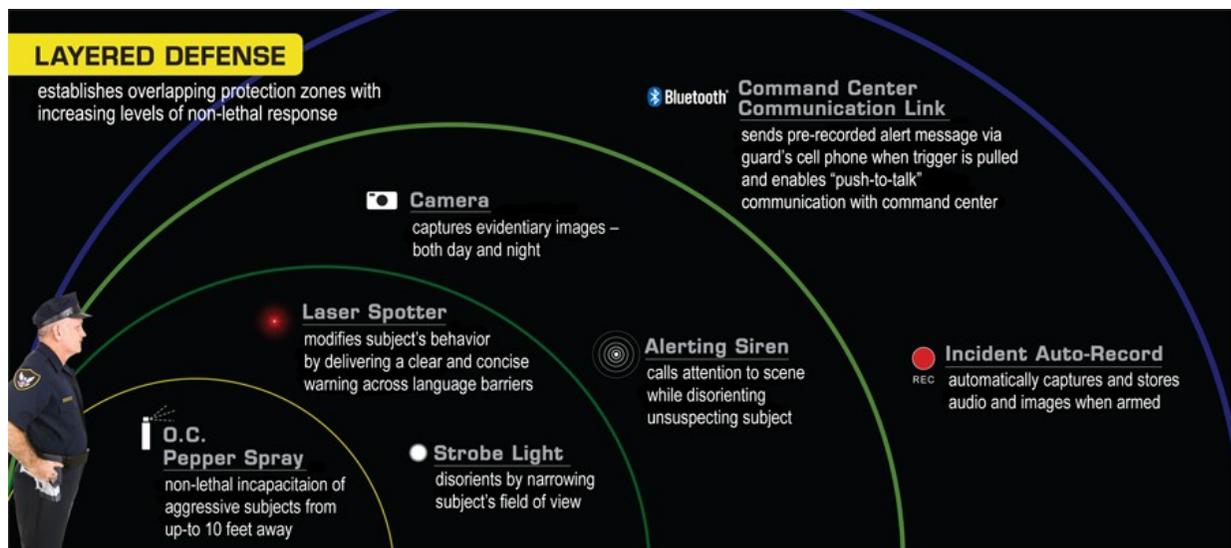

## G8 Pro V2

The G8 Pro V2 provides security guards with eight non-lethal methods of action that are designed to de-escalate a confrontation during an encounter with a perceived threat between a security guard and a trespasser. The hand-held unit provides **three levels of response** to an approaching and intensifying threat. The three levels are activated by raising the arming switch, partially depressing the trigger and fully pulling the trigger. Each action provides a different response, which can be custom-programmed by the user.

The G-8 Pro V2 not only is an effective intimidation device that potentially may avert incidents from occurring, but also provides guards with several solutions for communicating with authorities/supervisors and for documenting the engagement, along with four non-lethal defensive countermeasures.

When a subject has not been deterred by the presence of a security officer and is not obeying verbal commands, a **Level I** threat arises which requires a reasonable and measured response both to protect the guard from harm and to prevent liability risk. After withdrawing the G-8 Pro V2 from its holster, the arming switch is raised with the thumb, which arms the unit and activates the high-resolution HD **camera** an auto-record **microphone** and a **red laser targeting beam**. With the subject being informed that he is being filmed and recorded along with the targeting element instantly communicating the seriousness of the situation, the subject may modify his behavior and retreat.

However, if the situation escalates to **Level II**, with a half-pull on the trigger, the guard activates an alerting high-decibel **siren**, an LED **strobe light** and a **prerecorded alert message** is transmitted through the guard's cell phone (via a patented Bluetooth connection protocol) to the communications command center or any other preprogrammed telephone number (for example, 911). The prerecorded message usually identifies the user, the location and the reason for the initiation of the telephone call. The guard can fully concentrate on the evolving situation without the distraction of reaching for a cell phone or two-way radio. The audible alarm draws attention to the scene, which should unsettle the subject and dissuade a potential attacker from aggression, while at the same time the strobe light impairs the subject's field of view and depth perception. A button on the device enables **push-to-talk**

**communications** for the user to initiate a real-time conversation with the command center (or 911), which may further convince the subject to disengage and opt for an exit strategy.

At Level III, using the laser spotter to target the subject, the guard may deploy oleoresin capsicum (OC) **pepper spray** through a full pull of the trigger. The OC spray is accurate within 10 feet and capable of up to eight bursts or a continuous stream for multiple subjects.

The 8.5-ounce G8 Pro V2 unit has ambidextrous controls and is powered by a rechargeable battery. The OC spray canisters contain 1/2 ounce of OC and has a five-year shelf life. Practice canisters are also available. On the company's web store, the G8 Pro V2 is priced at \$279.99.

**The use of each of the eight features can be customized** through deactivation so that the device can adapt to each specific company's security policies and protocols. Every potential customer views the force continuum differently; for example, the OC spray functionality may be disabled, eliminating all risk exposure to any liability concerning pepper spray.

### **Protective Patents**

**The company holds several patents** on the attributes of this physical security device, including pairing the device with a cell phone, the procedure of prerecording messages for use when there is a need for assistance (and the associated programmable microprocessor) and the product's unique pistol-shaped housing design.

### **Incident Reporting**

An important feature of the G8 Pro V2 is the **incident reporting** capability of the device to document events and reduce liability. After the event, sometimes corporations and their security guards are required to defend themselves against **legal claims**. Documentation of the encounter with both audio and date/time stamped images aids in the forensic reconstruction of an incident and broadens the scope of probative examination beyond total dependence on human memory. After engaging the arming switch, the camera automatically captures high-resolution images and high-definition videos of the event and stores the recorded images, video and audio evidence to act as an adjunct to eyewitness testimonies. The accuracy of human memory is subject to distortion, namely by intervening cognitive functions of the reconstructive memory process in which an individual's interpretive perceptions are used to fill in the gaps found in episodic memory. Video, image and audio evidence are considered physical evidence that are immune to selective or prejudicial recall and can be used to support a legal case in any potential litigation.

Not only do the recorded video, images and audio of an event reduce the legal risks associated with an incident, but also they **improve the efficiency of incident reporting**, an important and integral part of most security jobs. These digital records aid in documenting and assessing the incident. Many security incident report templates include a physical evidence summary that provides for the reporting of the existence of a video record. Furthermore, the images, video and audio can be utilized by the corporate security office for **guard training** in the future.

On April 3, 2014, Guardian 8 announced that the company had received a **documented hospital security incident** in which the Pro V2 device was used to defuse a situation. A violent patient assumed a fighting stance with clenched fists and threatened hospital staff. The hospital's security personnel responded to the incident and as the situation escalated, drew out a Pro V2 and deployed a Level 2 response (strobe light, sonic sounder and an automated alert transmission to the command center). Ultimately, the patient voluntarily complied; the Pro V2 recorded the incident on both video and audio. The documentation of the **successful de-escalation of a potentially violent situation in a hospital setting** validates and verifies the precept for the necessity of deploying enhanced non-lethal devices throughout the security industry.

## Training

Guardian 8 provides **training programs** to instruct users in the proper use of the G-8 Pro V2. Though the multiple capabilities of the device are intuitive to use, the practice afforded in a training session extend beyond reinforcing the procedure for activating each tool. The training also clarifies the guard's role in a confrontation, the appropriate response for given threats, the importance of maximizing distance during the situation and the role of documenting the incident with images and audio. The training programs and demonstrations that Guardian 8 has developed are geared towards the specific needs of each customer, whether a large corporate client or a private patrol security company.

The company offers one-day courses which certify attendees to train other security professionals on the implementation of a layered defense system and the proper use of the G8 Pro V2. The curriculum includes an overview of the digital image, video and audio evidence produced by the device, instructions on downloading and utilizing that evidence, training on the use of the communications platform, the application of the alarm/warning functions (siren and strobe light) and practice in targeting and operating the non-lethal pepper spray. During the course, there will be an emphasis on integrating the communications, warning and OC spray capabilities as a layered, defensive response to defuse a confrontational situation. The training sessions are offered nationally at a cost of \$179 per person.

---

## VALUATION

The appropriate valuation methodology for Guardian 8 is based on price-to-sales (P/S) due the character of Guardian's enterprise, namely a small-capitalization company, currently with negative profitability, but with an expected sales profile that should grow and expand over time as the company's initial product begins to be deployed within the private security industry. Ultimately, the growing revenue stream should manifest itself into positive earnings. The P/S valuation range for a small-cap, protection-safety company with a stable or moderately growing sales profile is usually between 3.0 and 5.5. However, during the early growth phase, when a company appears to have vast potential with the initial product that defines a new category, the top-end of the range can dramatically and significantly expand to well above 30 times sales.

Some insights into the valuation progression can be gleaned by examining the stock of TASER International (TASR: NASDAQ) during its formative years, which appears to be relevant to Guardian 8. Not only do both TASER and Guardian 8 operate in the protection-safety industry and focus on self-defense devices, but also TASER began as a single product company and evolved through the development and introduction of next generation devices. Therefore, TASER International has been analyzed as a benchmark for the valuation of Guardian 8.

In 1994, TASER introduced its first product, AIR TASER, a less-lethal self-defense device for the consumer market (at the time, TASER was prohibited from selling to the U.S. law enforcement and military markets). After a non-compete agreement expired, TASER introduced another product in late 1999 (ADVANCED TASER) which targeted the law enforcement market. The company's IPO in 2001 revealed that TASER had generated revenues of \$2.2 million in 1999 and \$3.4 million in 2000. The stock began trading at 3.0 times sales. As the company's sales grew rapidly, over the ensuing 12 months, the P/S valuation range expanded to 18.5 times. The stock then experienced a correction but after a year, rallied again to a valuation level over 40 times sales. When sales plateaued between 2007 and 2012, the valuation range reverted to a range between 3.0 and 5.5 times sales.

We expect the valuation of Guardian 8 to be similar to the TASER analysis. Guardian 8's revenue profile is expected to exhibit dramatic growth through management's execution of its strategy to market the company's novel defense device, which targets an unaddressed need of the security guard industry. Though Guardian 8 is a public company earlier in its life cycle, we expect Guardian's stock to trade initially in a **price-to-sales valuation range between 3.0 and 11.0**. If and when the company's sales

exceed \$5.0 annually, the stock valuation range is expected to expand to a higher premium multiple that is usually afforded small-cap companies that exhibit rapid sales growth and that operationally cross the breakeven point to profitability, which is also supported by the analysis of TASER's historical valuation profile.

Since Guardian 8 has the potential and is expected to generate meaningful revenues beginning in the fourth quarter of 2013, our price target is based on a price-to-sales ratio valuation using estimated revenues. At a P/S ratio of 11.0 on projected sales of \$3.9 million, **our price target is \$0.90.**

## HISTORICAL ZACKS RECOMMENDATIONS

## DISCLOSURES

The following disclosures relate to relationships between Zacks Small-Cap Research ("Zacks SCR"), a division of Zacks Investment Research ("ZIR"), and the issuers covered by the Zacks SCR Analysts in the Small-Cap Universe.

### ANALYST DISCLOSURES

I, Steven Ralston, CFA, hereby certify that the view expressed in this research report accurately reflect my personal views about the subject securities and issuers. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the recommendations or views expressed in this research report. I believe the information used for the creation of this report has been obtained from sources I considered to be reliable, but I can neither guarantee nor represent the completeness or accuracy of the information herewith. Such information and the opinions expressed are subject to change without notice.

### INVESTMENT BANKING, REFERRALS, AND FEES FOR SERVICE

Zacks SCR does not provide nor has received compensation for investment banking services on the securities covered in this report. Zacks SCR does not expect to receive compensation for investment banking services on the Small-Cap Universe. Zacks SCR may seek to provide referrals for a fee to investment banks. Zacks & Co., a separate legal entity from ZIR, is, among others, one of these investment banks. Referrals may include securities and issuers noted in this report. Zacks & Co. may have paid referral fees to Zacks SCR related to some of the securities and issuers noted in this report. From time to time, Zacks SCR pays investment banks, including Zacks & Co., a referral fee for research coverage.

Zacks SCR has received compensation for non-investment banking services on the Small-Cap Universe, and expects to receive additional compensation for non-investment banking services on the Small-Cap Universe, paid by issuers of securities covered by Zacks SCR Analysts. Non-investment banking services include investor relations services and software, financial database analysis, advertising services, brokerage services, advisory services, equity research, investment management, non-deal road shows, and attendance fees for conferences sponsored or co-sponsored by Zacks SCR. The fees for these services vary on a per client basis and are subject to the number of services contracted. Fees typically range between ten thousand and fifty thousand USD per annum.

### POLICY DISCLOSURES

Zacks SCR Analysts are restricted from holding or trading securities placed on the ZIR, SCR, or Zacks & Co. restricted list, which may include issuers in the Small-Cap Universe. ZIR and Zacks SCR do not make a market in any security nor do they act as dealers in securities. Each

Zacks SCR Analyst has full discretion on the rating and price target based on his or her own due diligence. Analysts are paid in part based on the overall profitability of Zacks SCR. Such profitability is derived from a variety of sources and includes payments received from issuers of securities covered by Zacks SCR for services described above. No part of analyst compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in any report or article.

#### ADDITIONAL INFORMATION

Additional information is available upon request. Zacks SCR reports are based on data obtained from sources we believe to be reliable, but are not guaranteed as to be accurate nor do we purport to be complete. Because of individual objectives, this report should not be construed as advice designed to meet the particular investment needs of any investor. Any opinions expressed by Zacks SCR Analysts are subject to change without notice. Reports are not to be construed as an offer or solicitation of an offer to buy or sell the securities herein mentioned.

#### ZACKS RATING & RECOMMENDATION

ZIR uses the following rating system for the 1,095 companies whose securities it covers, including securities covered by Zacks SCR:

Buy/Outperform: The analyst expects that the subject company will outperform the broader U.S. equity market over the next one to two quarters.

Hold/Neutral: The analyst expects that the company will perform in line with the broader U.S. equity market over the next one to two quarters.

Sell/Underperform: The analyst expects the company will underperform the broader U.S. Equity market over the next one to two quarters.

The current distribution is as follows: Buy/Outperform- 15.6%, Hold/Neutral- 78.9%, Sell/Underperform – 5.0%. Data is as of midnight on the business day immediately prior to this publication.
